CUE™

Your robot. Your rules.

Starter Guide

Meet Cue...

Cue is a clever and powerful robot that is full of personality. Four unique hero avatars allow you to choose the robot personality you prefer.

Give Cue more advanced capabilities by building powerful programs at the skill level that's right for you. Easily convert between block-based programming or text-based code. Create dynamic graphical programs to make Cue react to sensor input with lifelike behaviors.

USER PROGRAMMABLE LEDS & BUTTONS

Customizes your experience.

REAL TIME BLUETOOTH

Provides fast, easy connection to Apple iOS and Android smartphones and tablets.

IR RECEIVERS & TRANSMITTERS

Enables Cue to find and interact with other robots and IR beacons.

3 MICROPHONES & SPEAKER

Enables real time voice triangulation and personalized recording with playback.

DUAL MOTORS & POTENTIOMETERS

Supports head pan and tilt with accurate positioning.

3 PROCESSORS & SENSOR FUSION

Manages complex interactions among actuators & sensors – accelerometer, gyroscope, and wheel encoders.

3 PROXIMITY SENSORS

Detects objects from the left, right, and back at multiple distances.

2 POWERED WHEELS & ENCODERS

Provides quick navigation and precise distance tracking on nearly any surface.

Meet the Avatars

Customize Cue with an Avatar of your choice.

Choose your favorite avatar and explore an amazing depth of personality, expressions, and actions. Go beyond basic robotics with custom interactions that you'll create with Cue. Try chatting with each Avatar before selecting your favorite. Your first Avatar is free!

Smirk: Roguish Risk Taker

Smirk has a charming and boastful personality and loves to game the system. Smirk will gladly play competitively against or collaboratively with the user.

Zest: Flair Extraordinaire

Zest likes to show off and does everything with a bit of flair. Zest encourages users to always add the extra effort to make their creations not only functional, but breathtaking.

Pep: Eager Achiever

Pep is super eager to give things a try, but is sometimes unsure what the outcome will be. Even when mistakes happen, Pep does a great job learning from the experience and sees the user as a fellow student looking to do the same.

Charge: Compassionate Commander

Charge was built to lead and sees leadership as a way to help others solve problems. The trouble is, Charge can sometimes become overwhelmed by the issues at hand and may need a little help from the user.

Enter the Lobby

Lobby Launchpad

Whatever your mission, you can launch it from the Lobby. Use the Lobby as the central hub for all of your adventures with Cue. From there, you can program your robot with Create or Code!

Account Profile

Customize your profile and manage your account.

Robot Connection/ Avatar Selection

Switch Avatars and adjust your robot's settings

Create

Program your robot by building freestyle state machines similar to flowcharts.

Code

Program your robot by building code using block commands or text.

Code: Try It Out!

Adventures

- Tap Code in the Lobby and select Adventure.
- Launch Move and follow the steps.
- Try different stories in the Adventure section!
- Each story has 4 challenges that will introduce you to different features of Code.

Demos

- Unlock your first demo once you complete the first story.
-  Tap on the instructions icon and follow the directions to play with your demos.
- Revisit your unlocked demos by selecting Demos in the menu.

Code: Level Up Your Coding Skills

Select the My Programs section and create programs using blocks and/or JavaScript! You can toggle back and forth while you code as you level up your skills.

Block / Text

Quickly toggle back and forth between block commands and text code.

Coding Content

Improve your coding skills with 24 challenges and 6 demo programs.

Blocks

Drag and drop blocks to build your code.

Text

Tap the code to edit text commands.

Code Toolbar

Build your code with a blend of Actions, Events, Control Structures, Variables, Math Operations, and Functions.

Controls

Tap PLAY to run your program. Quickly edit your program with Undo/Redo buttons.

Create: Try It Out!

Tutorials

- Tap Create in the Lobby and select Demos.
- Go through Tutorial 1 and Tutorial 2.
- After you complete Tutorial 2, you'll unlock the Reactions demo.
- Try out the Reactions demo to see what fun you can have with Reactions!

Avatar Demos

- Scroll to the right and try out one of the avatar demos like “Try Smirk!” or “Try Zest!”
- Once the demo loads, run the program and follow the robot’s instructions.
- Customize the demo by changing the preset groups.

Create: Freestyle Fun

My Programs

Select the My Programs section and explore the different ways you can program your robot with Create! Choose from 6 different Action categories and 80 built-in sounds plus 10 custom sound slots to bring your creative ideas to life!

Conditional Links

Use links to direct the flow of your program. Tap the link icon to change the triggering condition.

Groups

Use Groups to combine multiple Actions and run them at the same time.

Action Categories

Choose from a variety of Actions to make Cue move the body and head, activate lights, react to sensor input, and play sounds.

Easy Editing

Use intuitive touch controls to customize each Action.

Reactions

Use continuous sensor input in your programs to create lifelike behaviors.
